Addendum 1:
RFP: WEB CONTENT MANAGEMENT, 10-12

Questions:

1. Please reduce 5.1 quantities from 20 to 17 sites.
2. We're not sure we understand the referenced line item stating: "Has API (interface) with Student Information System (Skyward)". Is single sign-on to Skyward sufficient?
 - a. Lightweight Directory Access Protocol (LDAP) will be sufficient interface between proposed system and Skyward. Document any additional added value services the proposed solution may have above and beyond LDAP system integration.
3. A typical storage amount per site is 1Gb but they are asking for "a minimum of 100Gb of storage access per site". Could this be an error? How much total extra storage would TISD require on the quote for the district solution?
 - a. The district is experiencing a need for campus generated video content storage and access via campus web pages. The district will accept a sliding scale for pricing and utilization of disk space. With a minimum of 50Gb district shared storage to 1Tb of district shared storage. The district will increase storage as demand requires over the duration of the contract.
4. Can we add lines to the price sheet for hosting and non-recurring fees?
 - a. Yes. Add lines as needed to reflect pricing structure.
