BISD TELEPHONE RFP ADDENDUM #1

This addendum documents the questions, answers and statements since the **BISD TELEPHONE RFP** release.

- 1) [Please submit the telephone design guide in addition to the network design guide.](#)
 - a. The RFP contained the proposed network design guide, but the telephone design guide was not contained within the appendix. Attached is a design guide developed by the manufacture of the current PBX equipment within the district based upon the manufacture's understanding of the clients' current design and proposed direction. It is the responsibility for the proposing vendor to provide a complete design, equipment, software, warranty and labor required for a successful implementation. The vendor's proposal will be evaluated on its technical merit by a technology team including an independent consultant, a manufactures engineer, and the district technology department. The vendor is responsible to verify the accuracy and completeness of the proposed design. The vendor has the responsibility to alter and/or modify this design guide to reflect the vendors understanding of the manufactures product line and the functional and technical requirements of the RFP. The attached design guide is just that, a design guide.
